**"MARKET VALUE" IS CORRECT BASIS**

**Judge Harrison Quickly Quiets Those Who Want Realty Values Reduced.**

**Winchester people who thought the new real estate assessment was too high have been confronted with the law which requires the valuation to be made on the basis of a "fair market value." This presentation of the case, put up to the petitioners by Judge Thomas W. Harrison, sitting in the Corporation Court, seems to have ended the complaints.**

**A good many motions were made by attorneys at the opening of the Winchester court Monday morning, representing clients who desired a reduction made of the valuation of their property, it being pointed out that the assessments had been largely increased over the old figures.**

**In declining to consider any and all motions bearing upon that subject so far as the cases in hand were concerned, Judge Harrison said he could regard previous assessments as a basis for present ones, and that the application would have to bring themselves within the status which requires that property be assessed according to its market value.**

**He was pointed out that some of the previous assessments, made on assessed property far below its market value, and therefore that was not sufficient ground for a motion to change the present assessments.**

**To change one, said Judge Harrison, would likely mean a review of all the assessments.**

**The returns show an increase of about \$230,000 in realty holdings in Winchester since the assessment of five years ago.**

**CREOSOTE PLANT DAMAGED BY FIRE**

**Principal Loss Will Be in Time Consumed in Rebuilding.**

**[Special to The Times-Dispatch.] Norfolk, Va., September 19.—The extensive plant of the Atlantic Creosoting and Wood Preserving Works, located on the Eastern Branch of the Elizabeth River, was to-day badly damaged by fire, which first threatened destruction to the \$150,000 plant. The loss of \$10,000 is covered by insurance. The fire started in the roof of the boiler house from an overheated boiler, and made rapid headway. But for the fact that the sheds over the creosoting cylinders had been removed a week ago, to be replaced by new ones, the fire would have spread to the main plant, and probably resulted in its total destruction, as in January, 1907. The plant was very busy, and the principal loss will be in time consumed for rehabilitation.**

**Commissary Is Destroyed.** [Special to The Times-Dispatch.] Chase City, Va., September 19.—The commissary of the Chase City Manufacturing Company was totally destroyed by fire this morning at about 6:30 o'clock. The loss is estimated at about \$3,500 worth of goods. A large quantity of the heavy merchandise, such as hay and flour, was saved. The fire broke out in the rear of the department prevented the spread of the flames to adjoining buildings, which were just across the street, those being the office and machine buildings of the wagon factory. The building and goods were insured.

**The cause of the fire is not known, but was discovered by the fire department near the front door. Insurance on the building amounted to \$600 and on the stock, \$1,400.**
